

TOWN OF STETTLER

<u>Prepared by:</u>	Town Engineer	<u>Number:</u>	VI-4(a)
<u>Adopted by:</u>		<u>Date:</u>	1992 02 18
		<u>Revised:</u>	

Title: **Utility Replacement Program (water, sewer, storm, curb and gutter, sidewalks, and roadways)**

Purpose: To have a system in place for the uniform repair and replacement of Town utilities, in a progressive manner.

Policy Statement: All required maintenance or replacement of water, storm or sanitary mains is to be completed prior to road paving.

Complete overhaul as required of the curb and gutters prior to road paving.

When required, sidewalk work is to be completed in conjunction with curb and gutter prior to road paving.

When maintenance of concrete structures is sufficient then just those areas requiring maintenance will be completed. However, if the remaining life of the concrete is questionable, the entire structure should be replaced to insure a longer usable life.

Roadways which have had the maintenance of the deep utilities and surface concrete will be paved.
