mportant notes for Outpatient Clinic patients

Stettler Hospital and Care Centre has both an Emergency Department (ED) and, newly installed as of August 2024, an Outpatient Clinic. The two are co-located in the ED

The Outpatient Clinic was created for patients requiring a non-urgent level of care without the need for a physician. These appointments are scheduled and by referral.

Please note: The ED and the Outpatient Clinic share staff in the event of an emergency case that requires additional assistance. While Outpatient Clinic appointments are scheduled. if emergencies require the assistance of both ED and outpatient staff, that care will take priority. This may lead to appointment delays.

We ask for your understanding and patience. We are making every effort to deliver care and honour appointments; however, on occasion, start times may be delayed

We ask that you please arrive for your appointment at the scheduled time and wait patiently. Delays may vary but it is a rare occasion to wait more than one hour. Please do not leave or reschedule.

We are working to care for you as soon as possible.

Unfortunately, some patients with appointments have become upset when their appointments

AHS aims to uphold respectful work and care spaces for its visitors, patients and staff. Physicians and staff will not tolerate verbal abuse.

Thank you for your understanding and patience as we care for both you and our emergency
